

# RoboCup Rescue Mounting Blocks

From 2012, Rescue and Open Rescue tiles may be lifted off the floor a total of 90mm. Tiles will be used as ramps so that robots can climb from one level to the next.

Note: More than one set of blocks can be used in a round. However, blocks cannot be used on top of one another.

**Materials:** 4 pieces of 70mm x 70mm x 90mm pine

**Note:** Tiles are simply offset 5 to 10mm to allow the ramp tile to rest on the block. Use white Gaff Tape to secure in place

**Note:** From 2013, there will be three block heights.  
Rescue:- 90mm & 180mm  
Open Rescue:- 90mm, 180mm & 270mm
